Bundled Peripheral Offerings for Standard Laptops and Tablets

If an end user already possess the items below, these items will be included, if desired by the agency, as part of the refresh with no additional charges. In some cases, the existing equipment is reasonably new and it will make sense to reuse that existing equipment rather than installing new equipment.

- L1740 TFT 17" 1280 x 1024 - DVI, VGA
- Docking Station 1.1
- 2004 Standard Keyboard USB US
- USB 2-Button Optical Mouse

Premium Offerings

At refresh, agencies may choose to upgrade, depending on what is currently deployed, to a premium desktop or laptop. Currently, VITA has one rate for desktop and laptops that does not differentiate between standard and premium configurations. VITA will consider developing additional rates for premium configurations to be implemented after transformation. Agencies that choose to upgrade to a premium desktop or laptop during transformation may expect to pay an incremental charge for the upgrade.

Request for PC Services

Agencies can select standard or premium configurations via the detailed discovery phase of transformation or the procure-to-pay (P2P) process. If an agency requests equipment that is not included in the standard or premium configurations (i.e. non-standard equipment), then the agency will be charged a one-time fee for such equipment. Agencies should use the eVA system for ordering non-standard equipment. As part of the eVA process flow, the agency will be able to view and approved the incremental expenses for the requested equipment prior to the order being finalized.
